VX

ANTIVIRAL SUPPLEMENTS

Radix Scutellariae Extract, mannan oligosaccharide, astragalus polysaccharide and other extract

COMPOSITION STUDY

BIOGUARD VX mixture of different extracts and compounds. Let's break down the components and discuss potential benefits:

1. **Chlorogenic acid**
Honeysuckle is known for its antioxidant properties.
Chlorogenic acid has been studied for its potential anti-inflammatory and Proven .
It may also have antibacterial and antiviral properties, making it useful in slowing pandemic.
2. **Baicalin:**
It's known for its anti-inflammatory and antioxidant properties.
It has been studied for its potential to support liver health and combat various diseases.
3. **Mannan Oligosaccharide :**
Mannan oligosaccharides are prebiotic compounds that can promote the growth of beneficial gut bacteria. They can enhance the immune system and support digestive health.
4. **Astragalus Extract:**
Astragalus is a herb known for its immune-boosting properties.
Astragalus polysaccharides are active to support the immune system, increase energy, and have antioxidant effects.
5. **Extra extractes**
Some more immune-boosting extracts have been added to support the drug for additional strength

Target Species

DOSAGE AND ADMINISTRATION

For Oral Administration

Poultry, Turkey: 1L per 750-1000L of drinking water for 3-5 days

Double dosage for serious conditions

Note: Please shake well before use

STORAGE

Store in dry & cool place, 5-25 Co. Store in closed packing

PACKING

250 ml , 1000 ml / plastic bottle

VALIDITY

2 years

INDICATIONS

BIOGUARD VX Promotes immune organ growth, strengthens the immune effect, and prevents vaccination stress.

Prevents

incidence seasons, e.g., influenza, Newcastle disease (ND), infectious bronchitis (IB), infectious bursa disease (IBD), and gram-negative bacterial infections.

BIOGUARD VX contains various extracts and compounds that may have potential benefits for poultry when used as a dietary supplement. However, it's essential to consult with a veterinarian or poultry nutritionist to determine the appropriate dosages and to ensure that it aligns with the specific needs of your poultry. Here are some potential benefits for poultry:

1. Immune Support:

Astragalus extract and its polysaccharides are known for their potential to boost the immune system. This can help poultry to better resist diseases and infections.

2. Digestive Health:

Mannan oligosaccharides are prebiotic compounds that can promote the growth of beneficial gut bacteria. This can enhance digestive health in poultry and improve nutrient absorption.

3. Anti-Inflammatory Effects:

Both the Honeysuckle Flower Extract and Radix Scutellariae Extract contain compounds with potential anti-inflammatory properties. This can help reduce inflammation in the gastrointestinal tract and other parts of the body.

4. Antioxidant Protection:

Honeysuckle Flower Extract and Radix Scutellariae Extract are rich in antioxidants, such as chlorogenic acid and baicalin. Antioxidants can protect cells from oxidative stress and may have overall health benefits for poultry.

5. Liver Health:

Radix Scutellariae Extract, particularly baicalin, is known for its potential to support liver health. Healthy liver function is crucial for overall poultry health.

6. Overall Well-being:

When used in appropriate amounts, these components can contribute to the overall well-being of poultry by supporting their immune system, digestive health, and reducing inflammation.

Important Note

that the effectiveness of this composition can vary depending on factors like the specific poultry species, age, and health condition. It's crucial to work with a poultry expert or veterinarian to determine the correct dosage and administration methods to maximize the benefits and ensure the safety of your poultry.

WITHDRAWAL TIMES

None.
