MICRO ELEMENT BIOSTIMULANT CATALOG

The Micro Elements & Biostimulant Catalog offers micronutrients and biostimulants that enhance plant growth and stress resilience. It provides sustainable solutions to boost crop productivity and improve root and soil health.

by
MAIZER

WE PROVIDE ALL THE NEEDS FOR
SUCCESSFUL AND SAFE FARMING.

**WE PROVIDE
ALL THE NEEDS FOR
SUCCESSFUL AND SAFE
FARMING.**

What Are Biostimulants?

Biostimulants are a groundbreaking innovation in agriculture, designed to enhance plant growth, resilience, and productivity by harnessing the power of natural biological processes.

Unlike traditional fertilizers that only provide nutrients, biostimulants work holistically, improving how plants absorb and utilize those nutrients while strengthening their ability to withstand environmental stresses such as drought, salinity, and extreme temperatures.

Packed with beneficial ingredients like humic acids, fulvic acids, amino acids, vitamins, and even seaweed extracts, these powerful solutions promote stronger roots, better foliage, and higher yields. Beyond boosting plant performance, biostimulants improve soil health by enriching organic matter, enhancing structure, and increasing water retention.

Compatible with fertilizers, crop protection products, and irrigation systems, they seamlessly fit into modern farming practices, making them a versatile tool for sustainable agriculture. In a world where farming faces growing challenges, biostimulants offer an eco-friendly way to reduce chemical reliance, improve resource efficiency, and deliver healthier, more productive crops while nurturing

the land for future generations. Collaboration is at the heart of our approach. We work closely with farmers, distributors, and agricultural professionals worldwide to understand their unique needs and provide tailored solutions that drive success. Our global network ensures that we stay connected with the latest industry trends and advancements, enabling us to deliver innovative products that set new standards in agricultural performance.

BIOSTIMULANTS

PRODUCT NAME

DESCRIPTION

PACKAGING

USAGE

CC UP:

A chelated calcium fertilizer with 10% CaO, utilizing L-aspartic acid for enhanced stability across a pH range of 4 to 9. It ensures effective foliar absorption and is compatible with various agrochemicals.

Bucket 1KG
Bucket 5KG

Growaizer:

A plant growth promoter containing Glycine-Betaine with over 97% purity. It's ideal for organic farming practices.

Bucket 1KG
Bucket 5KG

Aminoizer:

(for foliar nutrition and drip irrigation)
Designed for foliar nutrition and drip irrigation, this product boosts stress resilience with high levels of L-amino acids like L-glycine and L-proline. It contains 8.5% organic nitrogen.

Bottle 2,5LT/3KG
Bottle 10LT/12KG
Bottle 25LT/30KG

Pepaizer:

(for foliar nutrition and drip irrigation)
A high-concentration soil conditioner suitable for foliar application and drip irrigation. It offers 7.5% organic nitrogen and 42% amino acids and peptides.

PRODUCT NAME	DESCRIPTION	PACKAGING	USAGE
Raizer Max (9-18-0+4.2B+4Zn) :	A foliar fertilizer enriched with Boron, Zinc, seaweed extracts, and Glycine-Betaine to enhance plant growth.	Bucket 1KG	   
Pepaizer Advance:	A liquid organo-mineral fertilizer containing 10.1% nitrogen, along with Boron, Molybdenum, Zinc, amino acids, and peptides to support plant nutrition.	Bottle 1LT/1,24KG	   
Weedaizer PW (0-8.5-5.1+SW):	An MKP-based foliar fertilizer infused with seaweed extract for additional plant benefits.	Bottle 1LT/1,09KG	   
Rootaizer Pro:	A foliar and fertigation solution that acts as a soil conditioner and bioactivator, promoting root development and improving nutrient uptake.	Bottle 1LT/1,2KG

PRODUCT NAME	DESCRIPTION	PACKAGING	USAGE
Raizer G:	(for foliar nutrition and drip irrigation) Strengthens cell walls and acts as a protective layer to reduce water loss and sunburn. Contains 8.5% SiO ₂ and chelated micronutrients (Cu, Mn, Zn).	Bottle 1Lt/1,23KG	 
Raizer S:	(for foliar nutrition and drip irrigation) Similar to Raizer G but with 42.8% SiO ₂ and 5% chelated iron, it enhances cell wall resistance and minimizes stress effects like water loss.	Bucket 1KG	 
Raizer Soil:	(for foliar nutrition and drip irrigation) Boosts soil fertility with a blend of 25% humic and fulvic acids and 60% total organic matter, improving soil structure.	Bottle 5LT/6,25KG Bottle 20LT/25KG 1000LT/1250KG	  
High Raizer:	(for foliar nutrition and drip irrigation) Rich in amino acids (56.2%) and micronutrients, it enhances metabolism during rapid growth and periods of stress.	3KG 10KG	  
Rich Raizer:	(for foliar nutrition and drip irrigation) A concentrated soil conditioner high in organic nitrogen (8.3%) and total amino acids and peptides (44.4%), enriching the soil.	Bottle 25LT/30KG 1000LT/1200KG

PRODUCT NAME	DESCRIPTION	PACKAGING	USAGE
Power Raizer:	(for foliar nutrition and drip irrigation) Natural extract that promotes growth, rooting, and fruit quality. Contains 15% plant-based amino acids, natural hormones, and 20% organic matter.	Bottle 1LT/1,12KG Bottle 5LT/5,6KG Bottle 20LT/22,4KG 1000KG	 
Weed Raizer:	(for foliar nutrition and drip irrigation) Seaweed extract from Ascophyllum nodosum that enhances stress resistance, flowering, rooting, and improves fruit quality.	Bucket 1KG Bucket 2KG Bucket 5KG Bucket 20KG	  
PH LOW:	(for foliar nutrition and drip irrigation) Low pH extract from Ascophyllum nodosum to aid nutrient uptake and boost plant vitality.	Bucket 1KG	   
Zero Stress:	(for foliar nutrition and drip irrigation) Improves embryogenesis and fruit set with natural metabolites that promote vitamin production, including folic acid.	Bottle 1LT/1,25KG	  
O Genesis:	It improves embryogenesis and fruit set due to its high concentration of natural metabolites that promote the production of vitamins (such as folic acid). It contains, among other components, Organic N, K, B, mannitol, amino acids, glycine, and betaine.	Bottle 1LT/1,24KG

PRODUCT NAME	DESCRIPTION	PACKAGING	USAGE
ROOT SOIL:	(for foliar nutrition and drip irrigation) Enhances soil structure and root development using microionized leonardite rich in organic matter and humic substances.	Bottle 1LT/1,12KG Bottle 5LT/5,6KG	
Great 7:	(for foliar nutrition and drip irrigation) Enhances plant resistance using 7-Copper Gluconate complexed with seven glucose molecules, boosting metabolism and strengthening cell walls.	Bottle 1LT/1,27KG Bottle 5LT/6,35KG	
Great 6:	(for foliar nutrition and drip irrigation) Improves systemic plant resistance with 6-Copper Gluconate bound to six glucose molecules, stimulating metabolism and cell wall lignification.	Bottle 1LT/1,25KG Bottle 5LT/6,25KG	
Équilibre:	Équilibre is a liquid macronutrient fertilizer with 7% Nitrogen, 15% Water-Soluble Calcium, and 4% Organic Carbon, designed to improve soil health, counter salinity, and enhance productivity.	Bottle 20LT/29.2KG
